

Please do not change Indiana's do not call list program. I moved in October to a new address with a new phone number, and had to wait to be put on the list until January. You can't imagine how many annoying calls I received during that time. I had previously been on the do not call list, and it made my life much easier. I do not appreciate being solicited or harassed on my telephone. What we have here in Indiana is working. Please do not change it.
